MARCH 2016

VOLUME 43, NO. 3

**FLINT WATER CRISIS SPECIAL REPORT PULL-OUT, PAGES 5-8**  
THE UNTOLD STORY BEHIND THE POISONING OF FLINT, MICHIGAN

Flint resident Sarah Pruskei holds her daughter Gabriella Verdas, 6, as she screams out with tears rolling down her face while health official Pruskei feels her finger for a free lead test on Monday, Feb. 8, 2016 at Cerridge Town Ministries in Flint. "My daughter takes a lot of baths. Just recently she's been having stomachaches. I took her to the emergency room but they said she was OK. She missed school today. There's something wrong with her," Pruskei said. "We don't drink the water. Bathing in it is supposed to be safe. But if it's safe, why do you have to limit the time? And you're breathing the steam when it's hot and the vapors enter your body through the air? We just don't know how it's affecting us. I'm a little worried for the lead test."

First resident Sarah Truesdell holds her daughter Gabriela Vargas, 8, as she screams out with tears rolling down her face while a health official looks on. The free clinic was open on Monday, Feb. 8, 2015 at Conover Community Center in Miami. "My daughter has a fever, she's been having stomachaches. I took her to the emergency room but they said she was OK. She missed school today. There's something wrong with her," Truesdell said. "I don't drink the water. Bathing in it is supposed to be safe. But if it's safe, why do you have to limit the time? And you're breathing the steam when it's hot and the vapors enter your body through the air. We just don't know how it's affecting us. # WHY ARE THEY POISONING OUR CHILDREN?

The *People's Tribune* wants to hear from you! We have covered the Flint water crisis since the water was switched in 2014. We print your stories, with the mission of bringing the movement together to create a vision of a better world and a strategy to achieve it.

The poisoning of the people of Flint, Michigan—especially the children—with lead and other toxins in the water, is just the latest ugly example that shows that this corporate ruling class is unfit to rule. An economic system that won't provide basic necessities like clean and safe water for its people must be and will be overturned and replaced with a system that meets the needs of the people.

To that end, the *People's Tribune* is a publication of those struggling to create such a new economic system. Our pages are open to you, to tell your stories and connect with the movement.

Please reach out to share your story, become a distributor, and learn about discussion groups in your area:
